

Brain Strain to Brain Gain:

Research tested techniques to improve student learning and retention.

Overview of the topic:

In this dynamic and interactive webinar, the presenter will examine current brain science about learning and retention and provide a variety of research-tested activities and techniques for practitioners to improve the learning and retention of their participants. The session will highlight anchoring techniques and examine the use of props as a means to reinforce a message and enhance the recall of content.

Key speaking points:

- Brain Facts
- Key research to support the application of brain science
- Creating learning that sticks
- Using brain science to help with content
- Using props to anchor a message
- Considering of your next steps to implement brain science into training

Outcomes participants will gain from the topic:

- Reflect on brain facts and how these may influence our learners.
- Identify key research to support the application of brain science in learning and teaching.
- Examine 5 ways to help make the learning stick.
- Discuss how to use props as an anchor for learning.

Presenter:

Marc Ratcliffe is a multi-award-winning trainer, author and education entrepreneur. He is the CEO and founder of MRWED Training and Assessment, a private RTO that specialises in

Trainer Training. He is a strong advocate for "edutainment" and believes that learner involvement and fun are integral to student success. He continues to be an in-demand conference speaker and workshop facilitator, having presented at more than 50 conferences in a dozen countries in the past decade and was recently named as the winner of the "Best Training and Development Leadership" Award for 2017 at the World Training and Development Congress in Mumbai.
